

Richmond Patent Lawyers

Richmond Patent Lawyers - Our company leads the way in intellectual property law. We have an Intellectual Property (IP) Group with a wide range of technological expertise specializing in the protection, use, exploitation and development of information technology and intellectual property.

Our professionals are knowledgeable at patent applications and trade-mark applications and registrations. Our members have assisted with several industrial design registrations and applications.

To offer effective legal advice concerning numerous complicated IT problems, a wide range of scientific skill and a legal background is required. Our experts have made the deepest research in these sciences. Some have engineering degrees while others have graduate degrees in the fields of chemistry, physics, biotechnology, electrical engineering, electronics and engineering physics. Amongst our group are members with doctoral degrees in applied chemistry, analytical chemistry, nutrition & metabolism, plant biogenetics, genetics, oncology and telecommunications. Advanced scientific backgrounds together with considerable skill at the bench equip our scientific professionals with exceptional skills and expertise.

The Industry

Now, intangible property is the most valuable asset of many research organizations and businesses. Obtaining effective and cost-effective control and protection of intellectual property is crucial in a knowledge-driven economy. Telecommunications, cultural industries and technology are essential to the nation's economic health and growth. To guarantee continued economic success, industries should have a well-developed intellectual property plan.

As the trend to protect research results previous to public dissemination grows, access to the rights of others through cross-licensing or licensing-in is a primary concern. Therefore, flexibility in an intellectual property position could serve the dual purpose of securing a niche market and providing an asset so as to create opportunities for additional revenue flow through licensing. A research-oriented or start-up organization can achieve significant advantages by combining intellectual property assets through cross-licensing with those of a large multinational corporation.

Protecting Intangible Assets

For many companies in today's competitive conditions, intangible assets like goodwill, brands and trade secrets are usually at the heart of commercial success. Thus, protecting intangible assets, which may consist of a significant portion of their value, is an essential approach to business.

Inter-disciplinary Approach

Our inter-disciplinary approach allows us to offer various services. We are well positioned to provide knowledgeable and up-to-date advice both to businesses in the area of technology and to those affected only incidentally by new technological developments.

To give our clients the best service possible, we work very closely together with experts in the areas of capital markets, human resources, banking; employment law; litigation; tax; and mergers and acquisitions. Our regular participation in client specific teams ensures that our clients have the legal and scientific support needed for difficult intellectual property management and protection matters, as well as commercial transactions, comprising outsourcing agreements, the establishment of strategic alliances, and initial public offerings in biotechnology, telecommunications and various technology sectors.
