

Impaired Driving Richmond

Impaired Driving Richmond - Patents are usually the most valuable assets that a company could have. It is vital that the patent portfolio is maintained and secured to be able to make sure that the business is able to continue to expand and even succeed.

As amongst the largest and respective patent teams in the nation, we have extensive skill in procuring patents and protecting them. Additionally, we help clients leverage patent matters with efficiency and skill.

We have a lot of different professionals in our team, comprising technical consultants, patent lawyers and patent agents. A lot of the consultants we have at our disposal have either an engineering or scientific Ph.D. A few examples of the areas wherein we have skill are aerospace, chemical, biomedical, civil, electrical, computer science, metallurgy and material science, industrial, mechanical, biochemistry, biotechnology, biomechanics, chemistry, food science, genetics, endocrinology, life sciences, immunology, microbiology, neuropsychology, molecular/cellular biology, neurophysiology, organic chemistry, pharmacology, physics, toxicology, and physiology.

The combination of acute business acumen together with our wide variety of technical skills enables us to provide a comprehensive understanding of an assortment of technical complexities. Our expertise and experience enables our clients to achieve optimal patent asset value. We are here to offer effective help and suggestion regarding licensing agreements and the negotiation of technology transfer as well as the enforcement of intellectual property rights.
