This comprises licensing, industrial designs, copyrights, trade-marks, confidentiality, trade secrets, biotechnology, software, and other technology matters. We are proactive in our approach to providing timely solutions to clients' issues.

We offer our services to a lot of clients from both the public and private sectors. Our passionate business clients care about the innovative services and products, offering the creative energy in order to be successful. They come from diverse fields such as the music, software, film, travel, service and manufacturing trades. Our company offers sophisticated legal tools and services meant to protect and secure our clients' products and services. When clients have global problems, we work extensively with foreign legal counsel so as to provide solutions.

To be able to solve the several business and technological problems, our firm seek to apply innovative approaches. We keep up with all the latest trends in technology and emerging media, to alert our clients to whichever potential legal impacts. To be able to ensure a full range of legal services are accessible to our clients, our lawyers form client teams together with other lawyers, when appropriate.

Copyright

The members of our practice provide professional suggestion concerning international copyright conventions and copyright legislation. Copyright holders will receive suggestion about infringement and enforcement. We even draft and review license arrangements, and assist with the registration and protection of clients' copyright both locally and internationally.

Trade-marks

As registered Trade-mark Agents, we prepare and prosecute trade-mark applications, conduct trade-mark and name searches, represent clients in trade-mark litigation, get clearance and pre-clearance both nationwide and internationally, and conduct trade-mark licensing. In order to assist our clients who are involved in mark arrangements and globalized name; we draw upon established relationships with a broad network of trade-mark agents. They will help to ensure a smooth delivery on an inter-jurisdictional basis. Clients receive help in the resolution of disputes and the enforcement of trade-mark right in the administrative forums and courts.

Technology

We now have clients who are involved in the commercialization and development of new software and different innovative services and products. Our existing services can help the various new and emerging companies and organizations in the following fields: biotechnology, pharmaceutical, nutraceutical, hospitals; video game development and publishing; and software design and publishing. Our technology experts advise clients about issues like for instance the Internet and e-business, the use of "open source" code, technology transfers, system acquisitions, licensing, technology aspects of commercial mergers and transactions, joint ventures, distribution agreements, corporate structure and financing, as well as strategic alliances.

Patents

The members in our practice offer practical legal advice to clients about contractual problems associated to patents, like for instance the acquisition and licensing of patent rights.

Industrial Design

We have design experts to help our clients in the preparation and prosecution of industrial design registrations in Canada. Appropriate referrals to U.S. agents in connection with design patents within the U.S. can also be offered.

Litigation

We act for our clients in litigation relating to matters like disputes involving copyright, licensing, confidentiality agreement, industrial design, trade-marks, passing off, trade secrets and patents.
